Employment

MICROSOFT RESEARCH AI FRONTIERS

Senior Researcher

Remote

2026–

MICROSOFT RESEARCH AI FRONTIERS

Machine Learning Research Intern

Redmond, WA

2025

- Joined core development team of a 15 billion parameter multimodal vision-language model.
- Led integration effort, tool-use training, and evaluation for a multimodal computer-use agent application.
- Investigated grounding capabilities of our model on fine-grained visual reasoning tasks.

Education

GEORGIA INSTITUTE OF TECHNOLOGY

Ph.D., Machine Learning

2021–2026

UNIVERSITY OF SOUTHERN CALIFORNIA

B.S., Applied and Computational Mathematics, *magna cum laude*

2017–2021

Skills: Python, PyTorch, TensorFlow, HuggingFace, DeepSpeed, W&B, Linux CLI, Kubernetes, Docker, Git, Vim, $\LaTeX$

Selected Publications

1. [Phi-4-reasoning-vision-15B Technical Report](#)
($\alpha\beta$) Jyoti Aneja, Michael Harrison, Tyler LaBonte, John Langford, and Eduardo Salinas
Technical Report, 2026.
2. [Task Shift: From Classification to Regression in Overparameterized Linear Models](#)
Tyler LaBonte*, Kuo-Wei Lai*, and Vidya Muthukumar (* denotes equal contribution)
AISTATS 2025
3. [The Group Robustness is in the Details: Revisiting Finetuning under Spurious Correlations](#)
Tyler LaBonte, John C. Hill, Xincheng Zhang, Vidya Muthukumar, and Abhishek Kumar
NeurIPS 2024
4. [Towards Last-layer Retraining for Group Robustness with Fewer Annotations](#)
Tyler LaBonte, Vidya Muthukumar, and Abhishek Kumar
NeurIPS 2023
5. [Scaling Novel Object Detection with Weakly Supervised Detection Transformers](#)
Tyler LaBonte, Yale Song, Xin Wang, Vibhav Vineet, and Neel Joshi
WACV 2023

Selected Service & Awards

Reviewing: CVPR, TMLR, ICLR, ICML, NeurIPS, CVPR Workshop on Demographic Diversity in Computer Vision, ICLR Workshop on Spurious Correlations and Shortcut Learning

DoD National Defense Science and Engineering Graduate Fellowship (\$170,000)

2021

NSF Graduate Research Fellowship (\$138,000—declined)

2021
